## EXPERIENCE

### HKS Architects, Inc.

MARCH '07 – PRESENT

DEVELOPER, WEB APPLICATIONS

Joined HKS as a Systems Administrator out of college and was responsible for their Florida offices in Orlando, Tampa, and Miami with approximately 160 employees. In 2009 I took the opportunity to transition into the development group. I quickly became responsible for the maintenance and creation of all of HKS's web assets that span across several different languages and platforms including ASP.NET/C#, PHP, and Adobe Flash.

### Institute for Simulation and Training

APRIL '05 – APRIL '07

WEB DEVELOPER

A college internship that turned into a full-time opportunity, I worked on the CRATA team's web sites and applications while promoting the benefits of standards, graceful degradation and modern development techniques. Originally tasked with turning design mockups into compliant HTML/CSS code, I was able to quickly pick up ColdFusion which, combined with my already strong understanding of HTML, CSS and Javascript, I was invited to join as a full-time developer where I worked on both the UI and backend.

### UCF Office of Undergraduate Studies

JANUARY '06 – DECEMBER '06

WEB MASTER

Designed and coded websites for several Undergraduate Studies programs, conferences and competitions and was responsible for the maintenance and updates to the Undergraduate Studies homepage.

## EDUCATION

### University of Central Florida

DECEMBER 2006

BACHELOR OF SCIENCE

Digital Media program with a Programming for Media specialization.

## PROJECTS

Though many of my projects have been internal, you can view a sample via the links below:
